

THINCELL™ STRAIGHT BLADE BAFFLE

1" DEEP X 1" O.C. WITH TRIMMABLE WIDTH

The elemental simplicity of Aluminum Thincell™ Straight Blade baffles compliments the widest range of interior decors. The crisp 45° cut-off of the stock parts provides uniform shielding from the light source while maintaining a visual warmth not associated with parabolics. Stock parts are finished with white enamel paint, have cross blades 1" (25mm) deep, 1" (25mm) on center and are available in trimmable widths. ATTB's straightness and rigidity are assured by the formed side details. Custom widths, blade centers and side details are available for luminaires and ceiling applications.

THINCELL™ BAFFLES
